			PHASE 1						PHASE 2						
Faculty/Staff Student	Arts and Sciences STEAM	Student Center	Auxiliary Gym	New Soccer & Baseball Fields	B1800 Renovation	Classroom Space Addition	Bldg 4000 Renovation	Public Safety & Advanced Tech	Greenhouse Expansion	Shade House Expansion	Sculpture/C eramics Studio	Add'tl Parking	Walking Trails	Dark Sky Space	Comments
Faculty	4	3	1	2	2	1		3	8	9	7	5	4		Auxilary Gym hugely needed and will not affect growth/construction in other areas. New Fields protect us from title IX issues. Moving soccer (synthetic) up by track creates space for growth.
Faculty Faculty	1	3					3				2				Renovation of 4000, recording studio, elevator, 4226 larger to fit growing programs. State supports CTE through major funding = certificates. STEAM building supports students.
Staff		1		4											Areas such as the bookstore, veterans resource center, student life are no longer adequate spaces. Veterans resource center currently does not meet the needs of the growing veterans program. Needs more offices, study spaces and storage. Bookstore which is a key area all students go to is outdated, falling apart, fire hazard, and too small. Auxilary gym, fields could be moved to the later part of the project. Need for VET center w/in student center as they need dedicated space. Public
Faculty		1						2							Safety & Adv Tech in dire need of more space.
Not Listed	2	1	2	1	2	2		4	7	0	6	1	0	2	
Faculty	2	1	3	4	3	2		4	/	9	6	1	8		What is the sq footage of new gym? What does it contain? How can I provide
Faculty Faculty		1	1	2											input? Kinesiology Instructor A center for students that want to study together would be very helpful. Specifically for FST students newar the new proposed tower.
Staff		1													Student Center project should be one of the first priorities. We have out grown the current space. The book store is out dated. If the college really cares about putting students first, this should be at the top of the list.
Not Listed		2	1												Rooms that allow us to work in groups.
Student								1							A gym for public safety students.
Student								1							Weight room for putlic safety complex
Student								1							A weight room for the public safety building or near the tower.
Student			3					1				2			Public Safety & Adv Tech building expansion is my main priotiry. I would like to see more parking near lot "o" and "new parking lot." I would also like to see a gym for student access due to the importance of health as well as keeping emergency medical responders in shape. It would also be nicer because I can be out in this area 3 times a week.
Staff															Make all of Phase 1 items Phase 2 and make all of Phase 2 items Phase 1.
Faculty	2	1	3	4											The bond was heavily marketed to the community as supporting veterans. Prioritizing the student cetner will help fulfill the promise that was made to the voters. Would love to see the planetarium move up. It would be a wonderful oportunity for student and community engagement.

T	
	I feel very strongly that new science facilities should be the highest priority. They are currently impacted, in need of serious maintenance/renovations in 1800 and students cannot get the classes they need. If anything they should build more labs faster than proposed in the FMP. Our community has high paying jobs in science, engineering and medicine (nursing). Lets train students for the 21st century.
2	
	Expansion of BLC room
	We don't need another gym & soccer field. A bigger room for BLC would be
	good.
	Free parking
8	
	4. Infrustructor & road way improvement
	Combining Priority 1 & 2: 1 STEAM 2 Classroom Addition 3 Budling 1800 4 Student Center
	Aux Gym should be built in Parking Lot P at top of campus hill drive. Placing it on the existing soccer field is foolish and throws good money on a prior poor choice to put the field inside loop road. There is no need to build a new soccer field and the money and space can be better used in the future.
	STEM we cannot meet current demand on some of our courses due to lack of space (e.g. anatomy lab). This problem will only get worse as our programs in sciences grow. 1800 Reno will allow other expanding programs to utilize building efficiency. Greenhouse/Shade expansion, need adequate space for storing hort program. Biology can also use.

7	

Faculty	1	4			2				3		
Faculty	1			2							New science lab is critical. Renovation of 1800 to accommodate growth for physics, engineering, geology, etc. is critical. There should be some physical connection between new science bldg & the older 1800. The 6 new labs for chemistry are a minimum requirement to replace the 3 curernt labs.
Faculty	1			2	1			3			Ideally a rubric would be created (I have an old one) to help judge what is most important. Enrollment? Program Completion? Safety? Otherwise, things devolve into 1. Making sure each division gets something 2. wish lists 3. pet projects 4. what sounds fun.
Student	1	3						4	2		
Student			1			2					For the public safety building a coffee shack would be nice so we don't have to walk all the way back to the cafateria.
Faculty		1									Remodel Veterans Program. Has consistently been put on hold. Space necessary for orientation to students and HS partners.
